CENTURY 41

Autopilot and automatic trim operating airspeed limitations (if any) will be specified on the operation placard or in the flight manual supplement. The Century III servo mechanisms are designed with a fail safe electric engage and disengage features. The autopilot may also be overridden by the pilot without damage to the system.

CENTURY III

The Century 41 is the advanced digital logic design roll/heading/pitch autopilot with built in VOR/LOC/GS couplers and outputs to drive a single-que, V-Bar flight director system. The basic system consists of the mode programmer, system annunciator, directional and attitude gyros and servos. The Century 41 is a proven concept in autopilot design.

Brian Niemi wrote:I have only one data point, but our A36 has a C-IV with flight director and its operation has been flawless for the past 5 years. I have ten years on my C-IV autopilot system. Not a single problem in the system. I exercise the servos regularly and perhaps this helps. As an example once a month I do the following: 1.

The Century III will do what you want, but it's older technology which predates GPS's, and even with the GPSS interface, it's just not as good for GPS work. Based on my experience with both, I recommend the 55X -- modern, reliable, and very powerful. The Century 41 would do what you want, but it's beyond your budget.
