This is an unrealistic time frame for mobile games because it would be nearly impossible to even break even, let alone make a profit. Most mobile games only cost the consumer \$.99-\$5.00 on average. That means if you sell your game at \$2 you have to sell 50,000 copies if you want to break even on a game with a \$100,000 budget.

What it Takes to Make a Profitable Mobile Game | Pluralsight

In fact, additional weakness works out even better for me because the lower prices fall now, the more profit opportunity there is buying the next bounce. Adjusting this trade for the more aggressive trader on Wednesday: If prices undercut Monday's lows (3,365ish) and continue falling, short that weakness with a stop just above this level.
